Claims Rejections - 35 U.S.C. 102(e)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 6-8, 11, 12, 14-22 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Glessner (U.S. Patent Application Publication No. 2004/004510).

Glessner discloses a folding knife (2, see Figs.4-7 and paragraphs [0030] to [0031]) comprising a handle (4); a blade (6) pivotally connected to the handle (4); a locking mechanism (24,32) pivotally connected to the handle (4) and directly engaging the blade (6) to lock the blade (6) in a closed position (see Fig.5); wherein the locking mechanism (24,32) and a protrusion (36) are located near a base portion (16) of the

blade (6); wherein the protrusion (36) extends from the handle (4) and the locking mechanism (24,32) includes a recess (i.e. the ratcheting slot, see paragraph [0031]) for mating with the protrusion (36) when the locking mechanism (24,32) is in a locked position (see Fig.5), wherein the locking mechanism (24,32) further includes a male portion (26) for mating with a blade female portion (40) when the blade (6) is in a closed position (note Fig.5) and when the locking mechanism (24,32) is in a locked position (note Fig.5); wherein the locking mechanism (24,32) includes a tab (i.e. the portion of the locking lever 32 that is accessible from the finger depression 38, see Fig.6 and lines 10-11 of paragraph [0030]); wherein the locking mechanism (24,32) further includes a pivot pin (30) for rotation within the handle (4), and wherein the blade female portion (40) is positioned along a sharpened edge side (14) of the blade (6) as claimed.
